RE: Crater Exploration, CATO Placer Sand #1, ACT/019/017,  
Grand County, Utah

On June 24, 1985, Dave Cline, Randy Harden, Rick Summers and Susan Linner of the Division visited the site of Crater Exploration's original CATO Placer Sand #1 operation along the Colorado River.

The area was regraded in spring of 1984 and appears to be stabilized with natural vegetation invasion occurring. The approved postmining land-use for this area is agricultural. As yet, no agricultural crops have been planted. There is still some equipment left onsite, but little debris was noted.
